DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-8, drawn to a method, classified in class 438, subclass 510.

II. Claims 9-17, drawn to a device, classified in class 257, subclass 355.

The inventions are distinct, each from the other because of the following reasons.

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make other and materially different product, such as a semiconductor device not having a minimum distance, in a direction parallel to a surface of the substrate, between the active zone of an isolated structures and any other active zone of the device, is greater than the thickness of the insulator layer of the substrate in a direction perpendicular to the surface of the substrate.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
